DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 47 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by Withek et al. U.S. Patent 5,393,681.

Withek et al. discloses a method of forming a vertical structure on a substrate, comprising; forming multiple overlying epitaxial layers, each epitaxial layer comprising sidewalls and a top surface, and insulative spacers formed over the sidewalls, and the uppermost epitaxial layer having an insulating top surface.

Allowable Subject Matter

3. Claims 1-46 and 48-100 are allowed.
4. The following is a statement of reasons for the indication of allowable subject matter: The prior art either singularly or in combination failed to anticipate or render obvious the limitations of removing a portion of the insulative layer to form insulative spacers over the sidewalls and exposed top surface of the first epitaxial layer and

selectively growing a second epitaxial layer of monocrystalline silicon on the exposed surface of the first epitaxial layer, the second epitaxial layer comprising side walls as required by claim one.

Response to Arguments

5. Applicant's arguments filed 09/19/02 have been fully considered but they are not persuasive. Regarding Applicant arguments with respect to claim 47 that the dielectric layers are formed prior to and not as part of the epitaxially grown layers, it is noted that the features upon which applicant relies (i.e., forming the dielectric layers prior to and not as part of the epitaxially grown layers) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Conclusion

6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 2812

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
